## WITH The Exchanges

### SIZING IT UP.

From Chihuahua (Mex.) Enterprise.  
The last issue of the Enterprise spoke in a somewhat light vein of the novelty of being deprived of almost everything that goes to make up the normal life of a modern city.

Today we are confronted with a situation more grim. In another column of this paper our merchants and employers of labor tell us that there is at most only six weeks' supply of coal on hand, and that the supply of provisions will be exhausted before many weeks.

What is the government of the republic doing in this fast approaching crisis?

Since Revolution raised its head in this state months ago, thousands of soldiers have poured into Chihuahua, and with all the equipment of modern warfare have gone out to meet the bandit insurrection.

What is the result? Today, almost unmolested, the forces of revolution patrol the entire state; the capital city, with its industries paralyzed, most of its operatives idle, faces a famine. Outside Chihuahua stands the grim and menacing figure of Orozco, shutting us out from the rest of the world, controlling the arteries of commerce and leaving or refusing to our merchants at his own sweet will the transportation of goods or passengers over a great railway system. The cure for these evils is a political one, and it is not for us to point it out.

### WILD BORDER TALES.

From Washington (D. C.) Post.  
Nowhere on the continent is there a better field for the exercise of imagination in painting the horrors of war than along the Mexican border. The

country is sparsely settled, but not entirely uninhabited. The dealer in sensations could not put forth a plausible tale of battles where there were no people at all. The spaces are vast, settlements are far apart, and, best of all, for the war correspondent's purpose, there is dense ignorance on the part of most Americans concerning the country, the people and the language. It was expected, therefore, that wild tales would come out of Chihuahua and Sonora. If these tales come fast enough, no one will take the trouble to check up the figures as to the number of combatants and the total of casualties. So it happens that the combined death losses of the federals and insurgents are far in excess of the number of men engaged on both sides. But that is a mere matter of figures, after all. It doesn't matter to any one who is not compiling statistics.

One feature of the reckless spinning of yarns may prove injurious, however. This is the danger of arousing resentment over the reported execution of American citizens without fair trial. Stories to the effect that Americans have been stood up against adobe walls and shot to death should be taken with great reserve, as the presumption that they are false is very great.

The Mexican government is practically on probation for a few months, to determine whether or not it can restore order. The insurgents, also, are virtually on trial, since the shedding of innocent American blood by them would be the signal for intervention by the United States. It is wholly against the interest of either side of the Mexican quarrel to invite intervention by this country. Thus far, both the federals and the insurgents have exercised great caution in dealing with American lives and property. They will not jeopardize their own cause by wanton injury to Americans.

A few Americans may be hurt in the Mexican scrimmage, but the chances are that they will be found to be eager participants in a fight that does not concern them. They have no right to mix in the melee, and if they are hurt, it will be their own fault.

## MEXICO A LAND OF GREAT ANTIQUITY

(Continued From Previous Page.)

of a window and run away with a half dried cast on the upper part of their bodies. He usually succeeds, however, in gaining the good will of the people.

One of the most important undertakings of today in attempting to solve the archeological and ethnological mysteries of Mexico is the preparation of a language map of the republic. It is said that there are nearly 70 Indian dialects in the republic, and that these dialects are spoken by practically the same people who spoke them in the days of the conquest. It is believed that with such a map it will be possible for the student of anthropology to get a picture of Mexico which will be of great assistance in determining the time at which the various tides of immigration swept into Mexico and the sources from which these various tides originated. There are abundant evidences of African and Chinese influences in early Mexican history, and it is the hope of the anthropologists, the ethnologists, and the archeologists that the next quarter of a century may make clear many of the mysteries of the past.

Tomorrow—Indian Races of Mexico.

## RIVAL CANDIDATES IN SCHOOL ELECTION

Strother Resigns the Presidency of Western College.

Artesia, N. M., March 29.—The non-partisans held a convention in the commercial club rooms for the purpose of putting in the field a non-partisan ticket for school directors. There were over 70 persons present consisting of Republicans, Socialists and Insurgent Democrats. Resolutions were passed favoring economy in the use of the school funds and condemning partisan politics in school matters. F. E. Larkin, a Republican, was nominated for school director for three years and judge J. E. Swenson, a Democrat, for the two year term.

The Democrats had an all day primary for the purpose of nominating two directors for school district No. 14. There were three candidates in the field, James J. Sullivan, Guy R. Brainerd and E. E. McNatt. There were 140 votes cast, the nominees being J. J. Sullivan for the three-year term and Guy R. Brainerd for the two-year term. The election promises to be a warm one and will bring out a large vote.

The Arthur Middleton recital given by the McDowell club at the Western college was largely attended and proved a great success.

Mrs. M. P. Skeen rendered the Women's club a report of her stewardship as delegate to the territorial federation of women's clubs at Las Cruces. She was elected treasurer of the federation.

Artesia will be represented on the petit jury at the April term of the district court by C. A. Spille, Owen McClellan, A. C. Keimath, R. M. Love, W. E. Ragsdale, Martin Yates and E. George. On the grand jury are Hart Crouch, J. A. Clayton, L. C. Hall, D. L. Looney, L. M. Zook and A. C. Southworth.

County assessor John W. Price is in Artesia looking after the assessments. The county commissioners have decreased the assessed valuation of farm land in this district by defining watered land to be land with sufficient water to cover it in season three feet, other land to be classified as dry land and assessed accordingly. Heretofore land with a well was classified as watered land, irrespective of the amount of land that could be watered. Lots in Artesia will be assessed the same as last year.

The women of the various churches will celebrate the women's sixth anniversary of work in the foreign mission field March 29 in the Baptist church.

This section was visited by four days of rain that has insured good crops and plenty of grass on the range.

Dr. Chester Russell has moved into the offices formerly occupied by Dr. J. Dale Graham.

Messrs. Williams and Yates have signed a contract with a Mr. Hall from near Malaga whereby they exchange their Artesia hotel for some black land in eastern Texas.

At a meeting of the board of trustees of Western college consisting of Rev. Mr. Cochran of El Paso, Rev. Mr. Clark of Clovis, Rev. Mr. Roswell, Rev. Mr. Young of Portales and Rev. Mr. Ray, C. A. Spille, J. E. Swenson and E. B. Kemp of Artesia, Dr. Strother, president of that institution tendered his resignation.

The mainline of the Artesia ice plant is being overhauled and will soon be put in operation.

The Bell Telephone company has secured an option on the plant of the Artesia Telephone company, the option expiring April 1. Options have also been secured on all the telephone lines of the Pecos valley.

Capt. C. R. Echols, of Artesia, and Maj. E. P. Bujac will represent the militia of the Pecos valley at the maneuvers about San Antonio. Capt. Echols is advertising for recruits for his company so as to have a full quota should he decide after reviewing the maneuvers that the regulars need his company.

## TELEPHONE SYSTEM HAS CHANGED HANDS

Two Routes Are Proposed  
For the New Road to  
Clovis.

Portales, N. M., March 29.—The Roosevelt county telephone system has changed hands. The Bell system has bought all lines from Port Salmeron in the deal. An additional \$100,000 will be spent in replacing the present wires with copper wire.

Rev. Edgar L. Young attended the meeting of the board of directors of Western college, at Artesia.

Interest in the proposed Portales-Clovis wagon-automobile road continues to grow. A recent meeting was held in Portales with ten boosters from Clovis present. There are now two routes before them for consideration. Monroe Hones is promoting one and "Uncle Pete" McDaniel the other. These men are now to find what help can be secured along each route in the way of work done on the road.

"But, at any rate, we women never understand men. They always keep us guessing, and perhaps it's curiosity that leads us, like Blue Beard's wife, into matrimony to find out what's hidden in the secret chamber of a man's soul."

But We Never Find Out.

"But we never do find out. We are poor Blue Beard women to the end of the chapter, for we always die just as we think we are about to get a glimpse within."

"Of course, there are millions of things about men that we never understand, but one of the mysteries that puzzles us most is why a man deliberately picks out one kind of a woman for a wife and another kind of a man to the world. Sometimes he's an angel to his wife and a devil to the rest of the world, and sometimes it's quite the other way about."

"Then—and this is where a man is the prize riddle of the universe—every man is one kind of a man to the world and another kind of a man to his wife. Sometimes he's an angel to his wife and a devil to the rest of the world, and sometimes it's quite the other way about."

"But, at any rate, we women never understand men. They always keep us guessing, and perhaps it's curiosity that leads us, like Blue Beard's wife, into matrimony to find out what's hidden in the secret chamber of a man's soul."

But We Never Find Out.

# 45c a Day to Run and Keep the Overland

OVERLAND AUTO CO., Toledo, Ohio.

Gentlemen:—When I talked of buying an automobile more than a year ago there were some very important questions that no one was prepared to answer: They were concerning the upkeep of the machine. I have kept a careful tabulated account of my year's expense, and am glad to furnish you with this information.

With the exception of ten days' sickness last winter, my machine has been run as a physician runs a machine in his practice scattered all over the city, besides taking many pleasure rides of evenings and some Sunday rides to adjoining country towns.

My gasoline cost me for the year	\$59.67
Lubricating oil	8.65
Transmission grease	2.63
Anti-freeze fluid	3.25
Battery cells	4.25

This makes for the year an average of 21 1-2c per day for actual running expenses.

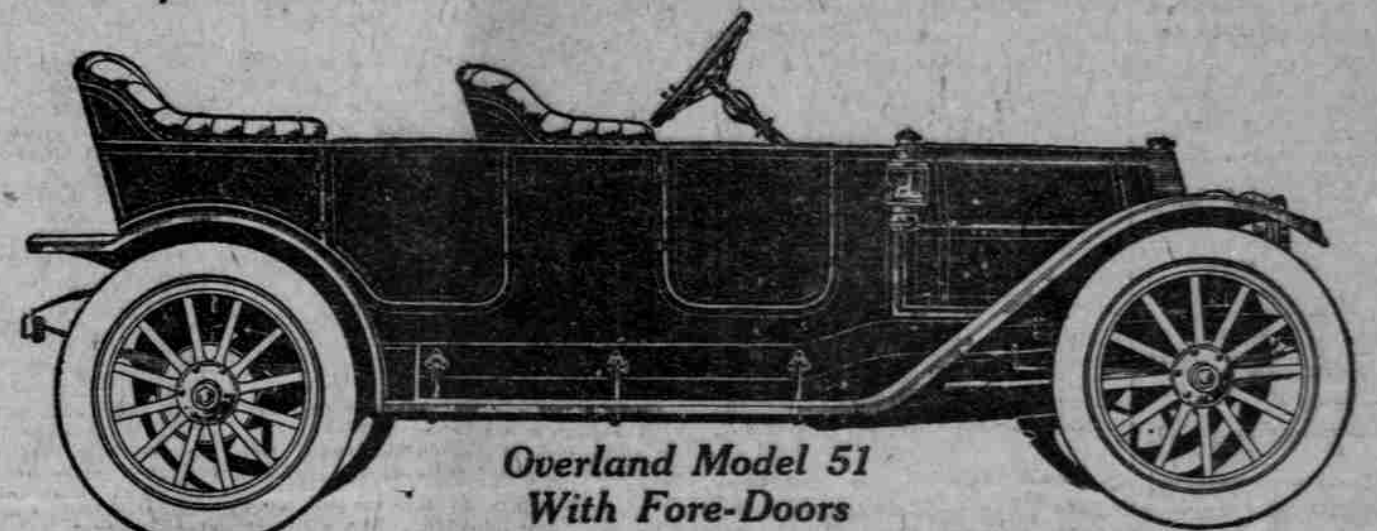

Other expenses, including all supplies and mending tubes, tires, patches, etc., as well as licenses and all expenses connected with owning a machine, cost an additional 23 1-2c per day, making a total of 45c per day. I have not heard of any car that compares with the Overland in economy for upkeep.

Yours for the Overland,  
W. R. STEWART, M. D.

It is, of course, impossible for any manufacturer to say how much it will cost an owner to operate his car. There is a wide range of difference in conditions and in drivers. The very nature of the Overland manufacturing methods insures a car that must perform to be efficient, reliable and economical. We know from our own experiments and from the actual experience of Overland owners that it offers the greatest automobile value when purchase price is considered, and that it can be operated and maintained at less cost than any car of similar rating. We make five models, all with high duty, quiet, four-cylinder motors, from 20 to 40 horse-power. There are twenty-two body styles, priced from \$775 to \$1675.

This car shown below is Model 51, with fore-doors and center control, that is to say, the shifting lever and emergency brake lever are inside the car in the center of the driver. Notice on other fore-door makes the levers are outside, proving that the body is patched up with the fore-doors to meet the latest ideas. Model 51 has a 30 horse-power, four cylinder motor, at that; is a marvel of efficiency, quietness and reliability. Dual ignition, magneto and battery, 110-inch wheel base; seats five people; tires, 34x3 1/2 inch; three speeds forward and reverse; selective type transmission. Brakes internal expanding, external contracting on rear axle drums.

On Things About Men Women Can't Understand

Little Mysteries None Can Solve.

"MEN complain that women are uncomprehending," said the first woman, "but I tell you that the most temperamental lady that ever lived is simply an open book to words of one syllable, that you can read as you run, compared to just an average, ordinary, apparently commonplace man."

"For one thing, there are certain well classified strata of peculiarities in every woman's composition that read as it were, a signboard of 'Keep Off the Grass,' that warns you where to duck and dodge, whereas each individual man has his own individual eccentricities and cussedness that no previous knowledge of men enables you to locate in advance, and on which you unwarily stumble to your own undoing."

"Then—and this is where a man is the prize riddle of the universe—every man is one kind of a man to the world and another kind of a man to his wife. Sometimes he's an angel to his wife and a devil to the rest of the world, and sometimes it's quite the other way about."

"But, at any rate, we women never understand men. They always keep us guessing, and perhaps it's curiosity that leads us, like Blue Beard's wife, into matrimony to find out what's hidden in the secret chamber of a man's soul."

But We Never Find Out.

## NEVER ANY INDIGESTION, DYSPEPSIA OR SICK, GASSY, UPSET STOMACH.

A little Diapiesin will make  
you feel fine in five  
minutes.

Take your sour, out-of-order stomach—or maybe you call it indigestion, dyspepsia, gastritis or catarrh of stomach; it doesn't matter—take your stomach trouble right with you to your Pharmacist and ask him to open a 50-cent case of Pape's Diapiesin and let you eat one 22-grain Triangule and see if within five minutes there is left any trace of your former misery.

The correct name for your trouble is Food Fermentation—food souring; the Digestive organs become weak, there is lack of gastric juice; your food is only half digested, and you become afflicted with loss of appetite, pressure

and fullness after eating, vomiting, nausea, heartburn, griping in bowels, tenderness in the pit of stomach, bad taste in mouth, constipation, pain in limbs, sleeplessness, belching of gas, flatulences, sick headache, nervousness, dizziness or many other similar symptoms.

If your appetite is fickle and nothing tempts you, or you belch gas, or if you feel bloated after eating, or your food lies like a lump of lead on your stomach, you can make up your mind that at the bottom of all this there is but one cause—fermentation of undigested food.

Prove to yourself in five minutes that your stomach is as good as any; that there is nothing really wrong. Stop this fermentation and begin eating what you want without fear of discomfort or misery.

Almost instant relief is waiting for you. It is merely a matter of how soon you take a little Diapiesin.

## Ella Wheeler Wilcox

Says Let Lincoln's Life Be  
a Guide To Your Steps.

YOUNG men are heard saying that they have had no help, no pull, no influence to push them into the paths of success; they cite the case of this and that man, who had a college education, or who had an influential father, or some "friend at court," and then, with despondent faces, they tell you their own failures are due to the lack of one or all these things.

Again young lads, in country places, proclaim their great desire to get on in the world; to make a name and a place for themselves. But they declare it is impossible without the aid of some good philanthropist who will finance their schemes for education.

Let all these young men and lads read the life of Lincoln!

Poverty, ignorance, loneliness, no influence, no help from any one without, but the invincible power within carried this poor country boy to the highest possible altitude in an American youth to reach in this life.

He studied while he worked; he had his books near by, and during a few leisure moments he memorized some passage, some fact, some idea which proved to be a mosaic in the pavement which his mind trod—the pavement leading toward the altitudes.

Nothing discouraged him; nothing made him doubt his own ability to become an educated man and to reach a position where he could hold places of usefulness and beneficial power.

Night and day this thought of improving his mind, of storing it with information, remained with young Lincoln.

He did not scatter his forces by weakly wishing that some great mil-

lionaire would take an interest in him and send him to college. He kept all his mentality to use in study, and in thinking about what he studied.

When a human being turns the whole force of his mind in any one direction, he must find that for which he seeks.

It is the law and cannot fail.

Lincoln found the place, the power and the opportunities to use that power for universal good, just as he had hoped.

He found it himself.

No one helped him. Had he received help he would never have developed to the full extent his own energies and concentration. These great factors in his success came by his having to find the way himself.

And that which you desire, if you desire it just as ardently and persistently as Lincoln desired education, you will find.

A BULLET PEEZLE.

From Albuquerque (N. M.) Herald.

The Mexican troops are said to be using dum-dum bullets in their fight against the insurgents. Either the federals are poor shots or those dum-dums are not what we have been led to believe.

Check a cough or cold in the lungs before it develops a serious case. BAL-LARS HORSESHOE SYRUP is an effective remedy for all soreness or congestion in the lungs or air passages. Price 25c, 50c, and \$1.00 per bottle. Sold by Scott White & Co., 244 Mills St. and Depot Pharmacy.
